

RicoGel 25+25+25

Balanced, metabolic activator in gel form

General Information

RicoGel 25+25+25 is a highly concentrated, balanced NPK foliar fertilizer in gel form. It is considered as a complete and perfect fertilizer for all growth stages and for all types of plants and is also the best choice for being applied as a basic fertilizer. Nitrogen (N), Phosphorus (P), and Potassium (K) are the most frequently required in a crop fertilization program. Nitrogen is vital for vegetative growth and important for starch and protein synthesis. Phosphorus is vital for ATP synthesis and Essential for root development. Potassium is activator for many essential metabolic enzymes. The product is engineered to boost plant metabolism through then organic activators. RicoGel 25+25+25 is further enhanced by the integration of the E²DA technology (Enhanced Elemental Delivery & Assimilation) which promotes absorption and translocation of nutrients. Due to its excellent efficiency and leaving no sediment in irrigation strips, applying this product for greenhouse crops is highly recommended.

Advantages of RicoGel 25+25+25

- Enhanced nutrient uptake and increased efficacy
- Improved nutrient translocation and faster results
- Boosts metabolic activity while supplying necessary nutrients
- Increased efficacy resulting in lower application costs
- long shelf life

Guaranteed Analysis

Nitrogen: 25% 5, Available Phosphorous (P₂O₅): 25%, Soluble Potassium (K₂O): 25%, Organic Matter 10%

Recommendation for application:

Dosage 1-4 liters / acre with water lubrication or 200-400ml / 100 liters with foliar spray

Caution:

RicoGel 25+25+25 is compatible with most of the fertilizers commonly used in agriculture. It is recommended carrying out tests before mixing it.
